Acknowledgements

This catalogue could not have been written without the generous help and co-operation of the members of the Department of Medieval and Later Antiquities, later the Department of Prehistory and Europe, at the British Museum. Most prominent among these are Leslie Webster, Sue Youngs, Cathy Haith and Angela Care Evans, and in the Drawing Office Jim Farrant and James Copland Thorn. The result of the interest of Ian Freestone previously of the Department of Conservation, Documentation and Science at the British Museum is to be seen in his study of the constituents of the glass with M.J. Hughes and C.P. Stapleton. Duncan Hook carried out the analyses of the metal components of the silver cross pendant from Gravesend (Appendix 4, cat. no. 217). The drawings are almost all the work of Lisa Rearden with some contributions by Jim Farrant, Stephen Crummy and James Copland Thorn. The photographs are by Saul Peckham.

The National Grid References in the catalogue were provided through Dr Bruce Eagles then at the National Monuments Record (NMR) of the Royal Commission on the Historical Monuments of England (RCHME). All six figure numbers refer either to a large site (e.g. a cemetery) or a large modern feature.

When publication was decided upon in 2006 some updating was undertaken, and I am greatly indebted to Dr Sonja Marzinzik of the Department of Prehistory and Europe for assistance and for overseeing the passage of the manuscript. Valuable editorial assistance came from Ms Stephanie Zintl and Ms Sue Brunning.

A generous grant by the Association for the History of Glass has made the inclusion of colour images possible.

Ian Freestone would like to acknowledge the late Mr T.L. Martin for financial support for trace element analysis through the Renaissance Trust; Dr Sheridan Bowman, former Keeper of Scientific Research at the British Museum for supporting the project; Dr Roger Nathan for support in compiling the database and Mr Keith Matthews for help with the analyses.

British Museum Research Publications Editor's note

It is with much regret that we record that due to ill-health Vera Evison was unable to complete the final revisions to the manuscript, or to respond to the comments of the Peer reviewer.
