**Notes**

- All objects listed in this section were originally published in L.II with the locus 'Temple Area'. This is a very general term which gives the impression that the pieces were found somewhere close to the Fosse Temple. In many cases different or more specific locus information is available from excavation details written on the object and / or in the unpublished site records. Where such information exists from these sources, it is included below in an endnote for the relevant object.
- Excavation details as written on object read: D 100 S. of Shr. This most likely can be taken to mean Area 100, South of Shrine (ie Fosse Temple).
