- 79 This fragment may be from same vessel as 1980,1214.7869 from Bastion: E.18:Q.
- 80 This fragment may be from same vessel as 1980,1214.7868 from Bastion: F.18:L.
- 81 This context is not published in L.III, but further details are available from excavation card in unpublished site records.
- 82 Excavation details as marked on fragment read: D F18 Upper drain. The context appears to be part of the Bastion but it is not completely clear to which feature it refers. The 'upper drain' may possibly be the feature in E/F.17/18:N discussed on L.III:Text p.129, but this is by no means certain.
- 83 Letter indicating Bastion room illegible on this fragment.
- 84 There are no excavation details on the objects given below. However, most are listed on p.86 of Barnett 1963–4 as coming from the 'gateway in Level 3'. The remainder (nos.132301 and 132302) are probably included in an unpublished inventory list of 1956 which records 'Iron arrowheads from Gate and Bastion of L.III pl.60'.
- 85 Excavation details or labels associated with the objects listed below simply read 'Gate'. This most likely refers to the main city gate complex.
- 86 Excavation details on this object are as follows: Section S. Gate. It is possible that the 'south gate' referred to here may be the outer gate of the main city gate as it lies on the southern side of the complex.
- 87 Excavation details on label associated with these fragments are as follows: Middle Wall, S. of S. gate. It is possible that the 'south gate' referred to here may be the outer gate of the main city gate as it lies on the southern side of the complex. If that is the case, perhaps the 'Middle Wall' might be identified as wall 'b', described on L.III:Text p.98, which acted as a retaining wall on the eastern side of the roadway south of the city gate.
- 88 This locus refers to the slopes of the mound outside the line of fortifications at the south-west corner of the site. See L.III:Text p.25.
- 89 This locus refers to the slopes of the mound outside the line of fortifications at the north-west corner of the site. See L.III:Text p.25.
- 90 This locus refers to the slopes of the mound outside the line of fortifications at the north-east corner of the site. See L.III:Text p.25.
- 91 For brief description and drawing of fragment see Hankey *et al.* 2004: List no. C-39, p.1419, fig.22.19:7.
- 92 As n.56: p.2162, no.3.
- 93 Locus details for this object incorrectly published as Q.12:106 in L.III:pl.51.5.
- 94 All the objects listed below are marked D PAL N. Sound. and probably come from the Citadel (Palace-Fort) area. However, it is not clear whether N. Sound. is the same as the North Wall Sounding or refers to another sounding along the northern side of the area.
- 95 All the objects listed below are marked D PAL S. Sound. and probably come from the Citadel (Palace-Fort) area. However, it is not clear whether S. Sound. is the same as the South Wall Trial Cut or refers to another sounding along the southern side of the area.
- 96 As n.10: List no. B-40, p.1409; figs.22.13:11, 22.18:3. In this publication object given as found in South Wall Trial cut although excavation details written on fragment are as follows: D PAL S. Sound. See n.95 for discussion of these contexts.
- 97 As n.5: List no. B-39, p.1409; fig.22.13:10. In above publication object given as found in South Wall Trial cut although excavation details written on fragment are as follows: D PAL S. Sound. See n.95 for discussion of these contexts.
- 98 As n.10: List no. B-38, p.1409; figs.22.13:9, 22.18:2. In this publication object given as found in South Wall Trial cut although excavation details written on fragment are as follows: D PAL S. Sound. See n.95 above for discussion of these contexts.
