 35 Although published in L.III:Text p.415 no. 114 as a coin of Murad II (acceded AD 1421), it is probably a silver medini of the period c.1550–1650.
 36 Mistakenly listed as weight no.52 in notes for L.III:pl.50.11.
 37 Mistakenly listed as weight no.46 in notes for L.III:pl.50.10.
 38 Although they form part of the Lachish Collection which was transferred to the British Museum from the Institute of Archaeology in 1980, most of the objects listed in this section are not marked with any excavation details. A smaller number have some traces of excavation marks or labels but the information is too fragmentary or uncertain to identify the original locus or other details such as pottery type or field number. Also included in this section is one object from the Lachish allocation of the 1950s which is without excavation details.
 39 For description, discussion and drawing of fragment see Hankey *et al.* 2004: List no. B-36, p.1409, Fig.22.13:7.
 40 As n.39: List no. B-35, p.1409, Fig.22.13:6. In this publication locus details for the object are given as J.15:1031. However, as no locus details are marked on the fragment itself, the exact find spot cannot be confirmed.

 53 As n.2: List no. C-111, p.1424.
 54 Excavation details written in pencil on object as follows: ‘Under Stone Floor, B196 of Lachish III ... 488’. Reference to L.III rather faint and worn. It is not clear to which context the excavation details refer. No such storage jar was recorded from Grave 196, nor is it obvious which stone floor is indicated here.

Note

- 1 This bead matches the photograph published in L.II:pl.XXXV.55 where locus details are given as Fosse Temple III Room E with a second example known from Pit 248. This is problematic as excavation details written on the object give the locus as Pit 208 and no example of the type is listed from that context. At present it is not possible to determine the exact find spot for this object. It could have been wrongly marked or there could be an error in the publication. Either is possible.
